

After Care Instructions Root Canal

- Avoid chewing until the anesthetic has completely worn off
- Take any prescribed medications exactly as directed. Finish all antibiotics as prescribed, even if all symptoms are gone.
-
- Take any pain medication exactly as prescribed. Pain medication may make you feel light-headed or dizzy so do not drink alcohol or operate heavy machinery while taking this medication.
- Small pieces of the temporary may become dislodged. This is normal. If the entire temporary comes out, call our office as soon as possible.
- If you experience severe pain or swelling, call our office as soon as possible.

- An ice pack may be used in the first 24 hours to reduce any swelling.

- After 24 hours, resume eating normally as soon as it is comfortable.
